The Library of Michigan has just completed a compilation of the statistics for Public Libraries and Library Cooperatives. This information is provided from applications filed by February 1, 1983, and reports the data of the last completed 12 month operating year of the library agency.

The Public Library Statistics are divided into four separate reports with libraries grouped according to the population they serve. The four reports cover the areas of *income, operating expenses, resources, and resources and services*. A separate section provides *audio visual resources* holding information on public libraries.

Following the five statistical reports are two summary tables - the first table provides *Total statistical information* on each public library group - the second table provides *AVERAGE statistical information* on a "typical public library" for each public library group.

The next section of this publication provides the *annual statistics of services and resources* along with *directory and portfolio information* on each Library Cooperative.

The last section provides *geographic, directory, and general statistical information* on regional and subregional libraries serving the Blind and Physically Handicapped in Michigan.
